Baseball Info Solutions

Analyzing baseball statistics has taken the sport by storm ever since *Moneyball* brought statistical analysis into the public eye. However, in order to properly evaluate baseball statistics you need to have high quality, innovative data or you may draw the wrong conclusions. BIS has been supplying top notch, timely, and in-depth baseball data to its customers since 2002.

BIS collects a statistical snapshot of every important moment of every Major League Baseball game with the most advanced technology, resulting in a database that includes traditional data, pitch-by-pitch data, and defensive positioning data. The company also has the highest quality pitch charting data available anywhere, including pitch type, location, and velocity.

BIS provides comprehensive services to nearly half of the 30 Major League Baseball teams, as well as many sports agents, media, fantasy services, game companies, and private individuals.

John Dewan, the principal owner of BIS, has been on the cutting edge of baseball analysis for over 20 years. His experience goes all the way back to his days as Executive Director of Project Scoresheet, the Bill James led effort that pioneered the new wave of baseball statistics that are now common baseball terminology.

President Steve Moyer brings 15 years of baseball industry experience to BIS. His hands-on, can-do business demeanor helps set BIS apart from its competition.

The rest of the BIS team includes former professional and collegiate baseball players as well as programming and database management experts. Over the last four seasons, BIS has more than tripled its full-time staff.

BIS continues to grow within the industry while emphasizing personal attention to its customers. This focus on personal attention is evidenced by the fact that if you contact the office with an inquiry you are very likely to be able to speak to the company president directly.
